Cable/Premise Technician | AT&T, Spring, TX

August 2015 - January 2018

- Provided thousands with excellent digital/analog home services.
- Installed phone, internet, cable, fiber optic and satellite services from start to finish.
- Diagnosed thousands of cable issues from short circuits underground to roaches in the modem to satellites in outer space.
- Configured entire home network user experiences for countless customers—following up months later if necessary to ensure excellent, continued service.
- Finished in upper echelon of QC and customer satisfaction nearly every month.
- Bad knees and back led to mutual parting of ways, thus pivoting into software and web development.

→ Certifications

- Graduated from Austin Coding Academy Full Stack Web Development in 2020.

→ Other

Avid basketball fan, passionate (obsessed) collector of music, extremely meticulous and dedicated when motivated. I spent years training to play professional basketball overseas before multiple torn ACLs forked my life path. I have always been very technical, and computer interfacing has been fairly second nature since I could operate a mouse (although I only recently started coding). I can and will (and have) learn any technology to get the job done right. I follow a very iterative process and thrive in long-term goals and environments which value the big picture. I crave structure but will fall into a leadership role when it is absent.
